

## TheCue 3G Wireless Network Implementation Survey Form

**Responsible to Fill-in & Return:** DSI salesperson or end user

**Purpose:** By filling in this survey form, the DSI Production Dept. can accurately fulfill your order for a Cue system in a timely fashion and avoid any set-up and usage delays

**3G Provisioning and Service Usage:** Any and all 3G network usage accounts are in the client's name and the client bears all responsibility in accordance with said account(s). DSI will assist in the provisioning of new or expanded existing accounts.

DSI accomplishes this in several ways:

- DSI will assist client in understanding what is needed from his 3G provider(s) through the use of the information in this form and through additional guidance so the client understands the account parameters, service types, usage parameters and other technical data to ensure the appropriate circuits are provisioned
- DSI will take receipt of any SIM cards the client receives from his provider(s) and install, configure and test them in all new Cue units purchased for remote field usage(studio Cues are not/cannot be equipped with 3G capabilities)
- DSI does not own any accounts, bear any costs associated with these accounts, nor purchase any required hardware or SIM cards. The client is responsible for shipping or having delivered to DSI all SIM cards necessary for the system you have purchased. Deliver all SIM cards to: DSI RF Systems, Inc., 26H World's Fair Dr., Somerset, NJ 08873, att: Product Manager.
- DSI must receive the above SIM cards, as well as, expects all 3G network accounts to be in service 2 weeks after the receipt of the client P.O. so that delivery delays are not incurred(not all network providers utilize SIM cards- See below).
- DSI will supply modems as required in an express PCIO socket located on our modem circuit board. DSI is responsible for all modem provisioning.
- Sprint/Nextel 3G service has a unique provisioning process which DSI must be tasked with on behalf of the client- Process: As Sprint does not utilize a SIM card, DSI must have the modem we provide provisioned by Sprint through the use of the ESN number associated with that hardware device. DSI will utilize all of your provided contact information and open an account and provision it on your behalf. From there, all account details will be forwarded onto the client.

**Instructions:** ALL cells must be filled in as requested here otherwise delays in product delivery and/or activation will occur

Double-check to ensure the accuracy of all data so as to avoid further delays

**Questions:** Please reach out to your DSI salesperson or the DSI Product Manager

**Form Delivery:** Scan and e-mail or fax back to your DSI salesperson accompanied with your P.O. or no later than 5 business days after placement of your Cue order

### 3G Service Providers(Typical):

<b>Top Network Providers General Info.</b>		<b>Other Providers May Exist in Your Area</b>
<b>Provider</b>	<b>System Type</b>	<b>SIM Card Required</b>
AT&T	HSDPA(GSM)	Yes
